

Asha Baker

Instructional Design & Learning Technology Portfolio

Adult Learning | Technical Training | AI-Enhanced Learning | Workforce Development

ashabaker.cv@gmail.com | [linkedin.com/in/asha-baker-ailearning](https://www.linkedin.com/in/asha-baker-ailearning)

Portfolio samples are original, sanitized, or representative examples created for demonstration purposes. No confidential, proprietary, government-controlled, client-sensitive, or internal employer materials are included.

Professional Profile

I design practical, accessible learning experiences that help adult learners, technical users, and workforce teams build confidence, adopt new tools, and apply skills on the job. My work blends instructional design, facilitation, learning technology, AI literacy, technical documentation, job aids, assessments, and stakeholder collaboration.

Design Approach

- Start with the performance problem and learner context.
- Translate complex topics into clear learning outcomes and practice activities.
- Use job aids and performance support to help learners apply skills after training.
- Evaluate training through feedback, knowledge checks, performance tasks, and stakeholder input.

Core Capabilities

Capability	How It Shows Up in This Portfolio
Instructional Design	Course maps, objectives, storyboards, assessments, and alignment tables.
Facilitation	Instructor-led agendas, facilitator notes, learner activities, and discussion prompts.
Learning Technology	Technical training samples, shared workspace job aids, LMS-style course structures.
AI-Enhanced Learning	AI literacy course design, prompt writing activity, responsible use checklist.

Featured Case Studies

AI Literacy for Workplace Productivity

Learning problem: Adult learners needed practical, beginner-friendly AI training that explained AI concepts clearly and gave them a safe way to practice workplace use cases.

Sample artifacts: Course design document, prompt activity, knowledge check, evaluation survey.

Skills demonstrated: Needs analysis, curriculum design, AI literacy, responsible AI, prompt writing, adult learning.

New Hire Onboarding Program

Learning problem: New team members needed a structured path to understand tools, workflows, documentation, and role expectations.

Sample artifacts: 30/60/90 roadmap, checklist, manager check-in structure.

Skills demonstrated: Onboarding, learning pathways, performance support, knowledge transfer.

Technical Tool Training & User Adoption

Learning problem: Users needed clear training and job aids to consistently upload, organize, tag, and share documents in a shared workspace.

Sample artifacts: Quick reference guide, facilitator guide, software-training style prototype.

Skills demonstrated: Technical training, job aids, user adoption, workflow support, facilitation.

Leadership Communication Microlearning

Learning problem: New managers needed a short, scenario-based learning experience to practice giving clear and respectful feedback.

Sample artifacts: Storyboard sample, branching scenario, reflection prompts, knowledge check.

Skills demonstrated: Microlearning, scenario design, leadership development, behavioral practice.

Artifact Index

Artifact	What It Demonstrates
AI Literacy for Workplace Productivity	Course structure, objectives, module map, assessment plan.
Learning Objectives and Assessment Alignment	Objective-to-activity-to-assessment alignment and rubric design.
AI Prompt Writing Activity	Participant activity design and learner practice.
AI Knowledge Check with Answer Key	Knowledge check design and answer rationale.
New Hire Onboarding 30/60/90 Roadmap	Learning path and onboarding sequence.
New Hire Onboarding Checklist	Performance support and checklist design.
Technical Tool Quick Reference Guide	Job aid and technical training support.
Facilitator Guide - Technical Tool Training	ILT facilitation structure and timing.
Leadership Communication Microlearning Storyboard	Storyboard and scenario-based microlearning design.
Training Evaluation Survey Sample	Evaluation instrument and feedback use.

Tools & Methods

Area	Tools / Methods
Design Models	ADDIE, SAM, needs analysis, objective writing, storyboarding, assessment alignment.
Facilitation	ILT, webinars, discussion prompts, guided practice, learner feedback.
Learning Technology	SharePoint learning hubs, LMS-style course structures, Storyline-style prototypes, Captivate-style simulation concepts.
Content Tools	PowerPoint, Word, Excel, SharePoint, Jira, Confluence, ChatGPT/OpenAI, video and audio editing tools.
Evaluation	Knowledge checks, rubrics, learner feedback surveys, performance tasks, continuous improvement.
