INSTRUCTIONAL DESIGNER & TRAINING FACILITATOR

AI Training | Federal Learning Programs | Curriculum Development | ILT, Hybrid & E-Learning

PROFESSIONAL SUMMARY

Instructional Designer and Training Facilitator with 10+ years of experience developing training materials, facilitating adult learning, supporting federal clients, and translating complex technical concepts into clear, practical learning experiences. Experienced in AI literacy training, curriculum development, needs analysis, learning objectives, assessments, job aids, SharePoint-based learning hubs, stakeholder/SME collaboration, and online, hybrid, and instructor-led training. Strong background supporting government environments including FAA, DoD, FHFA, and EEOC, with experience managing timelines, documentation, user adoption, and training delivery.

CORE COMPETENCIES

Instructional Design | Training Facilitation | AI Literacy Training | Adult Learning Theory | ADDIE & SAM | Needs Analysis | Learning Objectives | Curriculum Development | Storyboarding | Scripting | E-Learning Development | ILT Delivery | Webinars & Workshops | Hybrid Learning | Assessments & Evaluations | Learner Feedback | Job Aids & User Guides | LMS / Learning Portals | SharePoint Learning Hubs | Stakeholder & SME Collaboration | Project Coordination | Training Metrics | Federal Training Programs | Technical Training for Non-Technical Audiences

LEARNING & TECHNICAL TOOLS

Articulate Storyline 360 | Adobe Captivate | SharePoint | LMS / Learning Portals | Microsoft Teams | PowerPoint | Word | Excel | Microsoft Project | Jira | Confluence | KSN | Power Automate | Salesforce | ChatGPT / OpenAI | Bubble.io | Video & Audio Editing Tools | Adobe Creative Cloud Familiarity

ROLE MATCH

- Designed and facilitated AI workforce training for adult learners through College of Southern Maryland.
- Developed learning objectives, lesson plans, instructional materials, assessments, job aids, and practical activities.
- Delivered technical training, 1:1 coaching, webinars, and user support for federal and government client environments.
- Worked with stakeholders, SMEs, CORs, and leadership to gather requirements, identify training needs, and support adoption.
- Created SharePoint-based learning hubs, documentation libraries, and training repositories to support learner access and knowledge transfer.
- Supported federal clients including FAA, DoD, FHFA, and EEOC.

PROFESSIONAL EXPERIENCE

Adjunct Faculty - AI & Workforce Training

College of Southern Maryland | Mar 2025 - Jun 2026

- Designed and facilitated AI literacy and workforce training for adult learners, translating complex AI concepts into practical business and workplace applications.
- Developed learning objectives, lesson plans, instructional materials, hands-on activities, and performance-based assessments.
- Delivered instructor-led training in an engaging, accessible format for diverse learners with varying levels of technical experience.
- Created practical AI exercises focused on responsible AI use, prompt writing, productivity, workplace application, and ethical implementation.
- Used learner feedback, participation, and performance data to refine content and improve training effectiveness.

Learning Program Coordinator / Program Analyst

LS Technologies | Jul 2020 - Feb 2025 | Federal Client: FAA

- Coordinated learning, onboarding, documentation, and user adoption initiatives for federal program teams in a government contracting environment.
- Worked directly with the COR, federal stakeholders, and internal teams to gather requirements, clarify training needs, and support reporting workflows.
- Developed onboarding materials, user guides, job aids, training documentation, and SharePoint/KSN support resources to improve knowledge transfer.
- Built and maintained SharePoint/KSN-based learning hubs, document repositories, dashboards, and tracking tools supporting access to training materials and program information.
- Delivered training and user support to help teams adopt new SharePoint sites, workflows, online forms, reporting processes, and collaboration tools.
- Supported monthly deliverables, project timelines, stakeholder updates, and training-related documentation for federal program leadership.
- Partnered with stakeholders to improve usability, streamline content organization, and ensure materials were accessible, current, and easy to maintain.

Learning Technology Specialist / SharePoint Analyst

Solution Foundry | Mar 2019 - Jul 2020 | Federal Client: DoD

- Delivered SharePoint training, 1:1 coaching, and end-user support for government users in a federal environment.
- Developed training materials, job aids, user guides, and process documentation to support system adoption and reduce recurring support needs.
- Gathered user requirements and translated business needs into SharePoint workflows, forms, lists, libraries, and user-centered solutions.
- Served as liaison between end users and development teams to troubleshoot issues, communicate needs, and improve system usability.

- Created procedures, support documentation, and knowledge resources to improve continuity and reduce loss of institutional knowledge.

SharePoint Training & Content Specialist

MetroStar Systems | May 2018 - Mar 2019 | Federal Client: FHFA

- Supported government SharePoint 2013/2016 portals by maintaining organized, accessible, and user-friendly content.
- Communicated customer business requirements to developers and supported site improvement processes aligned with user needs.
- Partnered with content owners to ensure web and training materials were current, accurate, well-organized, and easy to navigate.
- Drafted project documentation, process flows, meeting notes, issue logs, and monthly status report inputs.
- Supported user adoption by creating documentation and providing guidance on maintaining SharePoint content and uploading materials.

SharePoint Help Desk Analyst

EEOC | Mar 2018 - May 2018

- Provided SharePoint training and support to end users within a federal agency environment.
- Delivered just-in-time training and guidance to help users resolve common challenges and improve system proficiency.
- Created support documentation and quick-reference resources to improve adoption and reduce repeat issues.

Jr. SharePoint Developer / Coordinator

2U | Mar 2011 - Sep 2017

- Designed, maintained, and supported academic SharePoint intranet sites, document libraries, lists, forms, and permissions.
- Provided academic and placement support for 180+ graduate students in a paperless environment, tracking requirements and resolving process issues.
- Created documentation, process guides, and training materials for team leads and internal users.
- Coordinated meetings, agendas, read-ahead materials, presentations, notes, and action items.

SELECTED TRAINING & LEARNING PROJECTS

- AI Workforce Training Program - Designed and delivered AI literacy training for adult learners, including practical prompt writing, responsible AI use, hands-on activities, and real-world workplace applications.
- Federal SharePoint Training & Adoption - Created user guides, job aids, documentation, and training support materials to help federal users adopt SharePoint sites, document repositories, workflows, and reporting tools.
- Onboarding & Knowledge Transfer - Supported onboarding and knowledge transfer for federal program teams through documentation, training resources, process guides, and structured content repositories.

EDUCATION & PROFESSIONAL DEVELOPMENT

- A.S., Information Technology - Montgomery College
- Google AI Essentials Professional Certificate - Foundational AI concepts, generative AI, and responsible AI practices
- Full Stack Web Development Certificate - George Washington University, College of Professional Studies
- SharePoint Administration and Development Certificate - Montgomery College
- Salesforce Administration Certificate - Montgomery College
- Mastering Difficult Conversations Certificate - UNC Kenan-Flagler Business School
