Quick Reference Guide: Managing Documents in a Shared Workspace

This representative job aid supports users who need a simple, repeatable process for uploading, naming, organizing, and maintaining documents in a shared workspace.

Before You Upload

- Confirm the document is final or ready for review.
- Remove personal or sensitive information that should not be shared.
- Use the approved naming convention.
- Select the correct folder or category.

Upload and Tag the Document

Step	Action	Check
1	Open the shared workspace and navigate to the correct library or folder.	Location matches document purpose.
2	Select Upload and choose the file from your device.	File appears in the library.
3	Enter required metadata such as document type, owner, date, and status.	Required fields are complete.
4	Review permissions or audience before sharing.	Only appropriate users have access.
5	Notify the team or update the tracker if follow-up is needed.	Action item is documented.

Common Mistakes to Avoid

- Uploading to the wrong folder
- Using vague file names like final_new_v2
- Skipping metadata fields
- Replacing a file without confirming version history
- Sharing links before checking permissions
